Battery

Never try to recharge batteries or use fresh and used batteries together. Always use high quality batteries and same type only. Alkaline batteries are recommended. If you intend not to use the lamp for a longer time, take the batteries out to prevent damage by leaking batteries. Discharged batteries must be removed and are hazardous waste and must be disposed according to the national legislation.

Consumers are legally required to dispose of batteries at suitable collection points, vending points or dispatch bays. The crossed out wheeled bin means that batteries must not be disposed of in the household waste. Pb, Cd and Hg designate substances that exceed the legal limits.

Avoid looking directly into the beam, as it will dazzle.
